

Don't walk into the light

A lonely night in paradise it was to hard to understand
I can't forget the morning when, you were lending me your hand
A love is lost a moment gone when two hearts they stopped to beat
And if there would have been a light we both would have been complete

So why we never got the chance to, - live a life in peace
Is there something we can do to start all over again

No please don't move into the light, let us share the moment
there's no end, and we can walk together
No please don't walk into the light, let us feel/live our love now
and today - nothing divides us, never

Please don't go into the light, no don't you go
Please don't go into the light, no don't you go
I look affright, no don't you go
Please don't move into the light, no don't you go

The sun arises early but the nightfall never ends
Our open eyes together but, - now I'm holding a cold hand
The nightingale's still singing oh a song so sad but true
from now on my life is black and my heart forever blue

So why we never got the chance to, - live a life in peace
Is there something we can do to start all over again

No please don't move into the light, let us share the moment
there's no end, and we can walk together
No please don't walk into the light, let us feel/live our love now
and today - nothing divides us, never
