

Every Little Thing

It's four o'clock – a lonely night
I cannot sleep – I cannot hide
The rain of Avalon will never lie
My greatest love – she breaks my heart
Old memories – I tear apart
The rain of Avalon will pass me by
She told me once – she told me twice
My love is not her paradise
She said to me: "It's time to say goodbye"

Every little thing – I do for you
Every little word – I say it's true
Why can't we stay together
Just forever
Like great lovers do
Every little dream – I dream tonight
Every little kiss – please hold me tight
Oh baby I'm so lonely
You're the only
Oh baby love me, too

Every little thing – I'll make it true
Oh heaven must be missing you
Cause you're an angel, baby
Drive me crazy
Never make me blue
Every little smile – oh night and day
Your love is just a breath away
I feel your love is stronger
Wait no longer
All I want is you

Night in night out – I'm missing you
A broken heart – painted in blue
The rain of Avalon will never lie
A girl like you – a boy like me
This love is such a tragedy
She said to me: "It's time to say goodbye"
