

Play for me the melody of love

A lonely live it knows how to survive
and how to find a hidden heart
To become a lonesome one –
right from the start
Running through a desert
of an emotional disease
But in the end your love
will touch a heart
like a gentle breeze

Play for me the melody of love,
play for me one song is not enough,
Can you play for me my melody of love? -
because it's love I'm dreaming of

Here and there and also everywhere,
you might now find a yearning heart
The piano man he begins to play
and when the melody starts
You might be the person
to find the love of your life
So don't look to the ground,
keep your head up up to the skies.

Play for me the melody of love,
play for me one song is not enough,
Can you play for me my melody of love -
because it's love I'm dreaming of

Play now for me, play the melody of love
And we will find the way towards heaven
Oh play for me, play the melody of love
And we will find our way home
Play for me the tiny melody
Play for me the song and we might see
