

## Turn out the light

I have seen you dancing and I completely lost control  
A never thought that this could happen to me since I lost it all  
You could be the answer to all the questions I have had  
You could be the start to live a life I've never had

Deep inside my heart I know  
I won't be lost  
if you would feel the same  
And if you believe in me  
I'll never search again

You can turn out the light and it will be all right  
That we'll never be on our own again  
You can turn out the light and it could be the best time of our lives

Let us turn out the light holding each other tight  
Now that you would be the closest love of mine  
Let us turn out the light so you would be the very part of, very heart of mine

Let us turn out the light, let our loving ignite  
We would never be free, if we don't stop the fight  
Let us turn out the light, feel our loving tonight  
Like the world's never seen, we could be like a dream  
Won't you turn out the light?

So now let us dancing, oh let us dancing all night long  
This could be the greatest time for both of us - each other we belong,  
To live our lives together, oh together can't be wrong  
We could be the first the last, 'cause our love grows strong

Deep inside our hearts we know  
we won't be lost  
if we would feel the same  
If you could believe in love  
we'll never search again

You can turn out the light and it will be all right  
That we'll never be on our own again  
You can turn out the light and it could be the best time of our lives

Let us turn out the light holding each other tight  
Now that you would be the closest love of mine  
Let us turn out the light so you would be the very part of, very heart of mine

Let us turn out the light, let our loving ignite  
We would never be free, if we don't stop the fight  
Let us turn out the light and our loving ignite  
Like the world's never seen, we could be like a dream  
Won't you turn out the light?

Hugging kissing the bride  
Let us turn out the light and our loving ignite  
You could act like a queen, never ever I've seen  
Let us turn out the light, you are my beauty queen  
Now we turn out the light
