

Key To Freedom

Don't you know the world of now is crazy
Life goes down and down
A fight from round to round
And don't you know some guys are totally lazy
Some folks are on the run
The good old times are gone
And can you feel they lost their heart's desire
A trip to nowhere land
A life like in a trance
Don't you know by now they 're dancing on fire
A life from day to day
A painting grey in grey
And everyone knows it's a cruel, cruel time
We must change our behaviour
If we want to live in a better world
Don't close your eyes

You can find the key to freedom
Come and pray
For a better world in love and harmony
You can find the key to freedom
Come what may
Love is all around – hold on eternally
Love is a magic key
It's not a mystery
You'll find your life one day
Come on and go your way
Love is the only key
To leave this misery
Don't push your life away
Come on and let us pray
Get the power – get the power be happy – get the power

Don't you know some fools are living for money
They need a helping hand
The story never ends
And don't you know these guys are really not funny
Their hearts are crying out loud
And love is burning out
People create the future of this world
It's the twenty-first century
And we are on the way to a new generation
Of love and peace
